

Vibro-QHR

HANGERS For GYPSUM BOARDS CEILINGS

Vibro QH-R consists of a specially designed galvanized metal suspension hanger, with grappling edges for Quick & Easy connection with the standard ceiling metal profiles (60x27mm for false ceilings) according to DIN 18182-1.

Therefore, the labour cost decreases and it also facilitates the work of the installer. The rubber element of the **Vibro QHR** hanger is high quality polyurethane foam, with semi-closed cells, manufactured by the German company BSW under the trademark Regufoam®.

It is available in 2 different thicknesses of its elastic pad:

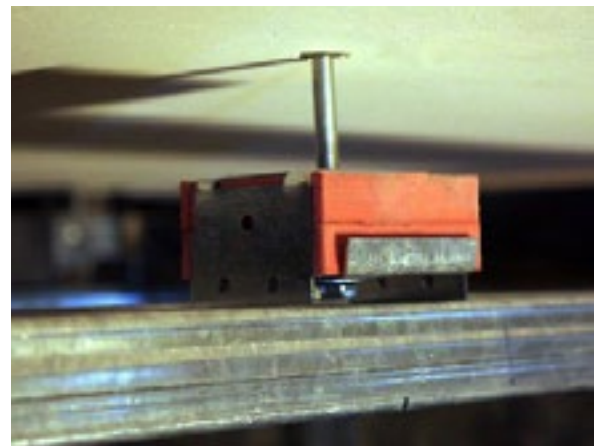

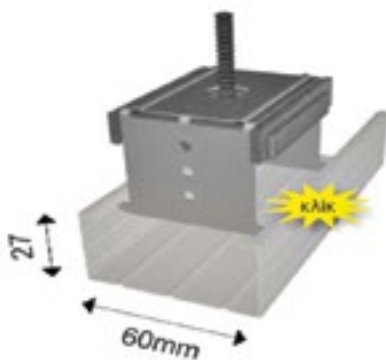

12mm (economic solution)

25mm (better vibration control)

Vibro-QH-R can be used as hangers for suspension of floating false ceiling with gypsumboard.

Selection Table

TYPE (Thickness)	MAXIMUM LOAD (daN)
Vibro-QH.R 20.(12)	20
Vibro-QH.R 20.(25)	20

Design and Production according to Quality Management System ISO 9001.2008 & Environmental Management System ISO 14001.2004
