

Vibro-SHR

HANGER with SPRING + Regufoam

Vibro-SHR is a combination of a high quality polyurethane cell foam (Regufoam®) and a metal spring, specially designed to isolate a very wide range of vibration frequencies, within the human ear spectrum.. It can be used in sound insulation of false ceiling with plasterboard or the vibration isolation of pipes, airducts, loudspeakers. It consists of a steel frame with painted finish or galvanised protection. They can also be pre-loaded by tightening the nut Hanging bolt and nuts not included.

It can be used in sound insulation of false ceiling with plasterboard or the vibration isolation of pipes, airducts, loudspeakers etc.

Selection Table

TYPE (Thickness)	MAXIMUM LOAD (daN)
Vibro-SHR 25	25
Vibro-SHR 50	50
Vibro-SHR 100	100
Vibro-SHR 150	150

Dynamic Characteristics

Deflection: 25 mm at maximum load

Natural Frequency: 3 Hz at maximum load

-Available also with 50 mm deflection (Vibro SHRD)

Design and Production according to Quality Management System ISO 9001.2008 & Environmental Management System ISO 14001.2004
